FAST FACTS

AHN WEST PENN
Hospital

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient – and access to clinical trials for the newest therapies.

CANCER INSTITUTE

We treat many types of cancer with the latest advancements in surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, and pathology testing. We continue to adopt new technologies to improve results.

- We have one of Pennsylvania’s largest cell transplant programs.
- Personalized treatment precisely targets tumors and preserves healthy tissues.
- Nurse navigators help cancer patients coordinate tests and treatment.
- The \$80 million AHN Cancer Institute – Allegheny General is the nucleus for research, clinical trials, and medical education — giving patients access to more than 200 clinical trials.

CARDIOVASCULAR INSTITUTE

We keep hearts beating using multimodality imaging and treatment with new medicines, advanced hybrid procedures, and implantable devices to fight heart, thoracic, and vascular disease.

- Robotic and minimally invasive surgery can reduce risk and speed recovery after coronary artery, aortic, vascular, and cardiac valve repair and replacement.
- AHN Women’s Heart Center offers innovative testing, assessments, and heart care customized for women.
- Preventive care includes cardiac education and screenings.

WOMEN’S INSTITUTE

We care for women throughout their lives with obstetrics, midwifery, NICU care, primary care, breast care, midlife care, advanced gynecologic surgery, pelvic health, bone density testing, and all medical subspecialties.

- 7,700 babies are born each year at four AHN hospitals. At West Penn, women can experience personal nursing care and family-centered childbirth in our spacious birthing suites, and our Level III NICU.
- AHN’s Alexis Joy D’Achille Center for Perinatal Mental Health is the first of its kind in the western Pennsylvania region and one of only a few in the country.

MEDICINE INSTITUTE

We treat a wide range of conditions, including allergies, lupus, diabetes, and Lyme disease, as well as digestive, dental, and skin conditions, breathing and sleep disorders, and more.

- In the AHN Autoimmunity Institute, a one-of-a-kind facility, multidisciplinary teams create and coordinate specialized care plans for patients with autoimmune disorders.
- We have Centers of Excellence for lupus, rheumatoid arthritis, celiac disease, and inflammatory bowel disease.
- AHN dermatologists specialize in phototherapy for cutaneous T-cell lymphoma, eczema, psoriasis, and contact dermatitis, as well as Mohs micrographic surgery for treating skin cancers, to decrease the risk of recurrence and provide optimal cosmetic results.*
- We strive to improve outcomes and lower costs for individuals with chronic conditions like diabetes, COPD, and chronic kidney disease.

ORTHOPAEDIC INSTITUTE

Our high-quality specialized care for orthopaedic injuries and complex musculoskeletal conditions helps patients regain mobility and health.

- New therapies for comprehensive, coordinated concussion care offer patients focused treatment plans so they can get back to everyday activities.
- Elite sports medicine specialists help athletes overcome injuries and return to the game.

BURN CENTER

AHN’s Burn Center at West Penn is the only pediatric center in the region verified for 20+ years by the American Burn Association and the American College of Surgeons.

- Our specialists treat adults and children with burns, soft tissue disorders, and other non-healing wounds.
